

Breast Surgery Post-Op Bra

Thank you for choosing Dr. J. J. Wendel Plastic Surgery and placing your trust in us. We are committed to helping you recover as smoothly as possible. What type of support to wear after breast surgery is an important question. We would like to help you make a good decision.

Two to three days following surgery you may change from the garment placed at the time of surgery to a more comfortable sports bra. We recommend bras with the following features:

- Soft, comfortable material
- Fasten or zip in front for ease-of-use
- Supportive cups
- No underwire, unless specifically instructed by Dr. Wendel
- No pushup, unless specifically instructed by Dr. Wendel

Note: For comfort and hygiene, you may continue to use medical gauze placed over the incision sites. Medical gauze can be purchased at any drug store or medical supply shop.

For your convenience, here is a list of bras that are compatible with the above recommendations. This list provides a range of choices. We encourage you to find others, if you wish. We welcome your feedback and are always looking for good choices to add to the list.

- **Bare Necessities** Leading Lady Front-Close Cotton Wire-Free Bra \$24.00
 - <http://bit.ly/BareBra110>
